## Project Description

If appropriate for your research project, please use the following headings in writing your project description:

- a. Specific aims/research questions
- b. Significance (with attention to how the study adds to the literature or advances your field)
- c. Approach (design, methods, and analysis)
- d. Expected products (e.g. conference presentations, publications, grant proposals)
- e. Future directions

Otherwise, you should focus on: (1) What you plan to do and when; (2) How you plan to do it; and (3) What product is likely to result.

This project description should be no longer than 10,000 characters (a space is a character); It is roughly equivalent to 4 to 5 double-spaced pages with 12 point Times font size.

You cannot include special characters, bolding, underlining, graphics, equations or formulas in the project description. If you feel your project description will not be understandable with these limitations, take a copy to your interview or work this out with your interviewer when they contact you to set up the appointment.

You can type directly into the Project Description field or copy and paste from a variety of file formats. For safety's sake we recommend creating the project description in a word processor and saving it before you copy/paste.

You can upload a one-page figure or document as a PDF containing figures, tables, a bibliography for this project, or other material that supplements your narrative description. The Online Application will guide you through the process. WARNING: Do not upload PDFs bigger than 50M. If you need help reducing the file size, please contact your department's IT Staff.
